ABOUT

Headquartered in Kuwait with operations throughout the Middle East, India, and Africa, UGCC serves both government and private sectors by providing resources and innovative solutions, with an emphasis on safety and quality control, producing high-quality results. Since 1975, UGCC has built a reputation as one of the most reliable construction companies in the region.

CREDENTIALS

GRADE 1

UGCC is recognized as a 'Grade 1' contractor for roads, infrastructure, building construction and having the highest grade of qualification for electrical works.

ISO CERTIFICATIONS

- ISO 9001
- ISO 14001
- ISO 45001
- ISO 17025

United Gulf Construction Company (UGCC) is a highly specialized provider of construction and engineering services to a broad range of clients including those in transportation (major roads, highways and bridges), civil infrastructure, oil & gas, water and waste water treatment and various other sectors.

- Roads & Bridges
- Civil Infrastructure
- Building Construction
- Oil and Gas
- Water and Waste Water Management
- Electro-mechanical
- Micro-tunneling

EXPERTISE

Having been instrumental in executing some of the most impressive and complex infrastructure projects in the Middle East, a continuous investment in core assets is just one of UGCC's many strengths. UGCC owns and operates one of the largest and most modern fleet of construction machinery and vehicles in the region, while continuing to upgrade its fleet regularly with the latest technology.

Additionally, UGCC has developed and maintains strategic relationships with major International partners to further expand its capabilities. Under the able leadership of an established management team, UGCC delivers results, year after year, in alignment with its vision 'WE BUILD BETTER'.

EXPERIENCE

UGCC possesses experience in a vast range of construction activities, with project experience in the following countries

- Kuwait
- Oman
- Iraq
- Libya
- Malawi
- India

HISTORY

UGCC WAS ESTABLISHED IN 1975, AND SINCE THEN, CONTINUES TO
LEAD THE WAY IN THE FIELD OF LARGE-SCALE CONSTRUCTION
AND ENGINEERING PROJECTS

UGCC CONTINUES TO GROW IN SIZE AND IMPORTANCE DURING THE ERA OF INCREASED DEVELOPMENT IN THE MIDDLE EAST, PARTICULARLY IN ITS MAIN MARKET OF KUWAIT

Since inception, UGCC has not only demonstrated excellent leadership and exemplary professionalism to each and every construction project, but has also built a team of committed professionals that include engineers, managers, accountants and financial executives. UGCC is a contracting company of the highest standards, where professionals of diversified disciplines work together to deliver construction projects of the highest quality.

48 YEARS OF EXCELLENCE

IN 2023, OUR 48TH YEAR OF OPERATION, UGCC CONTINUES TO
LEAD THE WAY IN THE FIELD OF LARGE-SCALE CONSTRUCTION AND
ENGINEERING PROJECTS

YEAR 2023

IN RECENT YEARS, THE GLOBAL CONSTRUCTION INDUSTRY HAS EXPERIENCED SIGNIFICANT ADVANCES IN TECHNOLOGY, INCREASED SOCIAL RESPONSIBILITY, AND A MEANINGFUL COMMITMENT TO THE HEALTH AND SAFETY OF THE WORKFORCE

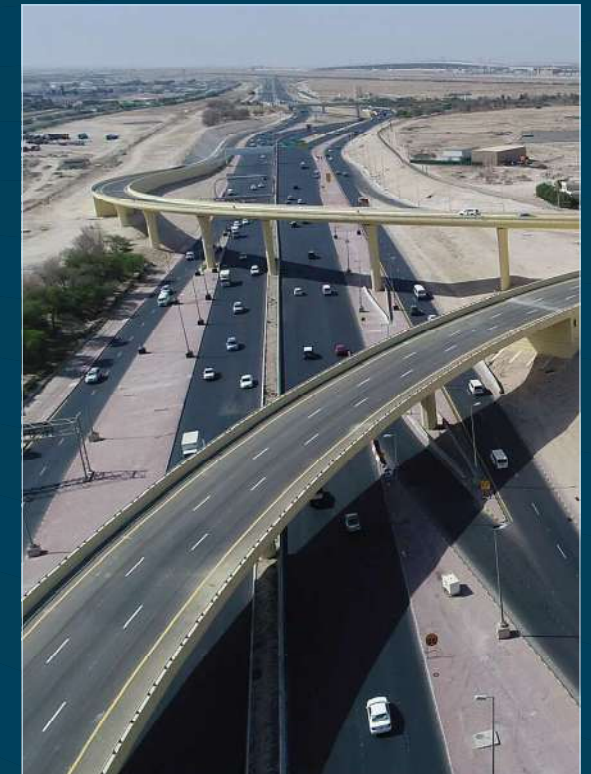

UGCC has stayed at the forefront of these advancements, proudly maintaining its position amongst the ranks of the World's most efficient and respected contractors.

In 2023, our 48th year of operation, UGCC continues to lead the way in the field of large-scale construction and engineering projects.

With over 7,000 employees, including more than 500 specialized engineers across various disciplines, operations throughout the Middle East and Africa, as well as projects under execution valued at over 1.5 Billion USD, UGCC's capabilities are recognized amongst the strongest in the industry.

An organization built from the ground-up, with an extensive history of delivering complex, turn-key projects to the most demanding clients, UGCC's technical expertise, continuous investments in plants and equipment, together with unmatched financial standing, are considered amongst the company's most notable strengths.

With core strengths including development of major transport projects, oil & gas facilities, infrastructure, and government facilities, UGCC's ability to deliver even the most complex projects continues to earn the trust of clients looking for a reliable partner.

CREDENTIALS

GRADE 1

UGCC is recognized as a “Grade I” contractor for roads, infrastructure, building construction and having the highest grade of qualification for electrical works

ISO 9001

In 2004, UGCC first achieved the ISO 9001 certification for its Quality Management System and currently, UGCC maintains ISO 9001 certification

ISO 14001

In 2012, UGCC first achieved ISO 14001 for Environmental Management System, and currently, UGCC maintains the ISO 14001 certification

ISO 45001

In 2007, UGCC first achieved OHSAS 18001 certification in Occupational Health & Safety, and currently, UGCC maintains ISO 45001 certification

ISO 17025

In 2019, UGCC achieved ISO 17025 Certification for the competence of UGCC Central Testing Laboratory for testing and calibration

KEY ATTRIBUTES

TECHNOLOGY

UGCC strives to stay ahead with the latest technology in machinery, plants, and facilities to improve the efficiency and quality of construction activities

CSR

UGCC is proactive in promoting corporate social responsibility for human rights, communities, and the natural environment

FINANCIAL STRENGTH

UGCC has an exemplary financial standing to sustain continuous support for the company's on-going projects, both locally and internationally

COMPLIANCE

UGCC ensures that all HSSE (Health, Safety, Security, and Environment) and QMS (Quality Management System) standards and guidelines are adhered to across all operations

PLANTS & EQUIPMENT

UGCC facilities include asphalt & concrete batching plants and machinery that are managed, operated and maintained by a well-trained and experienced team of engineers and staff

PROJECT MANAGEMENT

UGCC employs a hands-on approach to ensure efficient and adaptable project management as the foundation by which all operations are conducted

ENGINEERING EXCELLENCE

UGCC excels in providing value-driven solutions based on engineering and technical expertise

HSSE

HEALTH, SAFETY, SECURITY
AND ENVIRONMENT

ISO 45001

In 2007, UGCC first achieved international recognition for its health and safety programmes (HSE) by completing OHSAS 18001 certification in Occupational Health & Safety, and currently, UGCC maintains ISO 45001 certification.

Our commitment towards our employees' well being and prevention of accidents is summarized by UGCC's primary safety rule governed by Zero Accidents.

Our personnel continuously inspect changing workplace conditions to address hazards and minimise any potential risks. This policy not only enhances the safety of our work crews, it also reduces injury related downtime and maintains reduced rates of materials damage.

ISO 14001

In 2012, UGCC first achieved ISO 14001 for Environmental Management System (EMS) as a part of its management system to manage environmental aspects, and to fulfill environmental compliance obligations.

UGCC maintains the ISO 14001 certification.

UGCC aims to develop and maintain health, safety and environmental guidelines and high standard with the requirements of ISO 45001 and ISO 14001.

QUALITY

QUALITY MANAGEMENT SYSTEM

ISO 9001

UGCC is a multi-disciplinary contracting company that excels in quality control in the planning and project management of engineering projects throughout the Middle East and internationally.

We continuously strive to improve the quality of our performance and consequently, the service given to our clients. It is UGCC's strict policy to adhere to the requirements necessary to facilitate the planning and execution of projects, as well as our overall operations, in order to meet the latest ISO 9001 quality standards.

UGCC upholds continuously strive to improve the quality of its performance and consequently, the services given to its clients based on specification and quality standard with the requirement of ISO 9001.

QUALITY ASSURANCE

UGCC's quality assurance programmes are further measured against industry-specific benchmarks for performance and safety, and we pride ourselves on remaining ahead of our regional and international competition on these criteria.

In 2004, UGCC first achieved the ISO 9001 certification for its Quality Management System and currently, UGCC maintains ISO 9001 certification.

BUSINESS LINES

UGCC delivers outstanding work results through unparalleled engineering skills, professionalism, and strong commitment, while adhering to strict cost and time management. UGCC has always demonstrated its capability to deliver projects on, or often prior to schedule. Under the able leadership of its management, UGCC delivers construction projects of the highest quality in alignment with its vision- 'We Build Better'

ROADS AND BRIDGES

Bridges, motorways and road construction, landscaping services, and maintenance

CIVIL INFRASTRUCTURE

UGCC's highly skilled civil engineers design and implement civil infrastructures

OIL AND GAS

Gathering centers, heavy civil construction, pipe racks, tank farms, and more

ELECTRO-MECHANICAL

Street lighting, electric transformer units, plumbing, fire-fighting systems, pumps, VFD, HVAC, generators, odour control, chillers, cooling towers, and more

BUILDING CONSTRUCTION

Institutional buildings, residential housing, schools, industrial buildings, warehouses and commercial complexes

WATER AND WASTE WATER MANAGEMENT

Wastewater Management facilities, including treatment plants and pumping stations including the associated distribution networks

MICRO-TUNNELING

Micro-tunneling for diameters up to 3000 mm, and shaft sinking up to a depth of 30 m

ROADS AND BRIDGES

ROADS AND BRIDGES

UGCC specializes in the design, construction and maintenance of major highways/motorways, complex bridges, viaducts, and tunnels, in addition to suburban roads and related infrastructure.

Our capabilities are reinforced by one of the largest privately-owned fleets of construction plant and equipment in the Middle East, which enables rapid mobilization of the necessary resources for any project.

For bridges, our successful track-record includes the design and construction of pre-stressed precast concrete girder, segmental, post-tensioned concrete, and balanced-cantilever bridges.

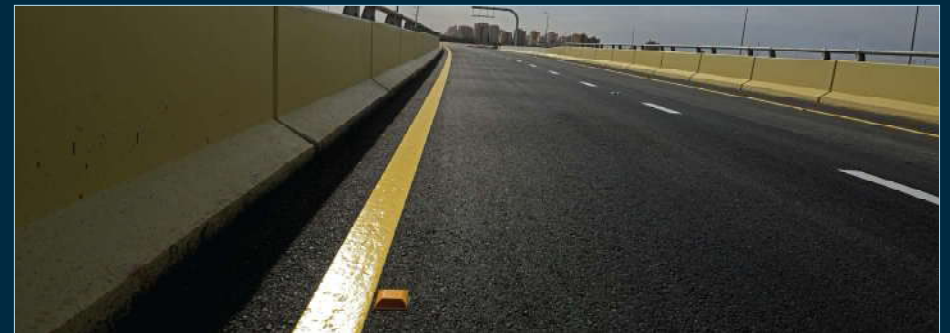

For roadways, UGCC leads the way in technology and innovation to improve and optimize quality of pavements, traffic safety, and construction phasing to reduce traffic congestion. Having successfully implemented the development and upgrading of major roadway systems under the most challenging conditions, our experience encompasses projects of varying magnitudes and difficulties.

As the largest producer of Hot Mix Asphalt in the State of Kuwait, UGCC has the ability to produce and pave more than 2,000,000 metric tons of asphalt annually, in accordance with the most stringent international standards and best practices.

CIVIL INFRASTRUCTURE

CIVIL INFRASTRUCTURE

UGCC has completed projects such as sewage, storm water drainage, water supply, telephone/electrical ducting and the construction and maintenance of pumping stations. The completed projects list includes the construction of storm water drains and sanitary sewers in Eqaila.

The projects also include the construction, commissioning and maintenance of pumping stations in (Data Management Center) DMC, Kabad and Wafra and the construction of all related infrastructure requirements for 930 houses in Sabah Al Ahmed Housing Project.

UGCC is a preferred contractor for special infrastructure projects and have placed more than 345,000 meters of pipeline, along with thousands of man-holes and inspection and washout chambers. UGCC crews have installed piping in a variety of terrains and ground types, ranging from desert to rocky terrain.

BUILDING CONSTRUCTION

BUILDING CONSTRUCTION

UGCC has completed building construction projects that include government housing, schools and universities, and industrial buildings, warehouses and complexes.

UGCC also constructs substations to support residential and industrial areas. The completed projects include the construction and maintenance of the Fintas superblock structure as well as construction of five stores in Subhan.

The projects also include the construction, completion and maintenance of 930 houses and all related infrastructure services for a residential town project, and the construction and maintenance of the College of Basic Education, Girls' Campus in Ardiya.

For housing and construction projects, top grade materials are sourced to ensure longevity and to meet appropriate building code requirements.

OIL AND GAS

OIL AND GAS

Construction projects in the oil & gas industry is a key component of UGCC's services.

UGCC constructs and provides maintenance services for gathering centers, heavy civil foundations, pipe racks including structural fabrication erection and foundations, pipe sleepers, tank farms, pre-engineered buildings, blast resistant shelters, dikes, ditches, roads, curbs, and parking bays.

UGCC also manages maintenance projects for government-owned oil companies.

In past, UGCC projects include handling roads maintenance services at various sites in Kuwait. The projects also include maintenance works for civil buildings and constructions at the Mina Ahmadi Refinery and an expansion of Heavy Oil MGC along with upgrading sub-centers facilities.

MICROTUNNELING

MICROTUNNELING

UGCC has international experience in installing pipelines at various locations with the Micro-tunnelling process.

UGCC's specialized teams can accommodate works requiring shaft sinking of pipes ranging in diameter from 250mm to 3000mm, and shaft sinking up to a depth of 30m. This service is required for projects ranging from civil infrastructure and sewage to electro-mechanical works and also for various construction requirements within the oil industry. This allows the work crew to divert existing utilities mains without lengthy service interruptions.

FACILITIES

To accomplish future initiatives, the company has established strategically placed plants and fabrication facilities.

In addition, UGCC owns the largest fleet of construction equipment and vehicles.

UGCC's fleet is constantly upgraded and kept to the highest technological and mechanical standards by management personnel and top engineers.

PLANTS

UGCC invests considerably in owning and maintaining plants and fabrication facilities

LABORATORIES

The UGCC Central Testing Laboratory is a leading facility in the asphalt industry testing and analysis, and the first of its kind to be certified under ISO 17025 in the State of Kuwait

EQUIPMENT

In addition to stationary plants and fabrication facilities, UGCC invests considerably in owning and maintaining one of the largest heavy equipment fleets in the Middle East

PLANTS

UGCC invests considerably in owning and maintaining plants and fabrication facilities and has established strategically placed plants and fabrication facilities.

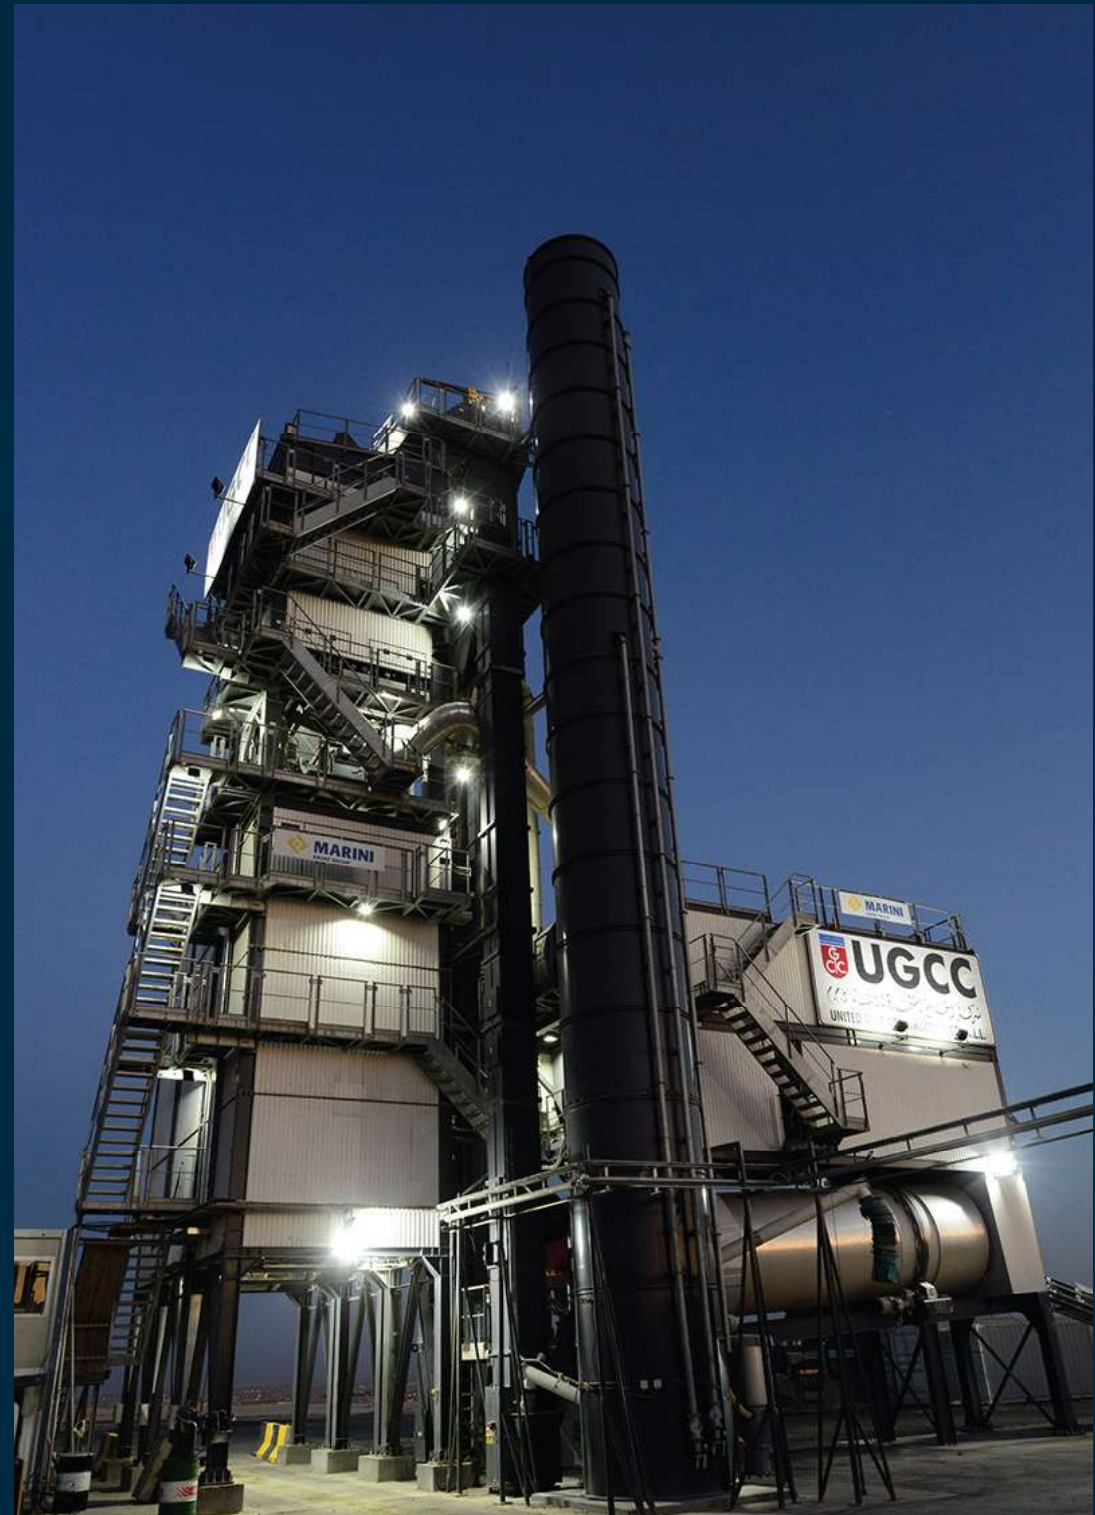

Plants are managed, operated and maintained by a well-trained, experienced team of engineers and staff, ensuring rapid deployment and continuous support for the company's projects, both locally and internationally.

The facilities includes asphalt plants with recycling facilities, concrete batching plants, crushing and screening plants.

DETAILS

PLANT TYPES AND PRODUCTION CAPACITIES

PLANT	PRODUCTION CAPACITY
Sulaibiya Asphalt Plant	160 Ton / Hour
Sulaibiya Asphalt Plant II (2021)	340 Ton / Hour
Salmi Asphalt Plant (2018)	220 Ton / Hour
Amghara Asphalt Plant	120 Ton / Hour
Sulaibiya Concrete Batching Plant	120 M ³ / Hour
Salmi Concrete Batching Plant	220 M ³ / Hour

LABORATORIES

UGCC has a total of seven laboratories, including the Central Testing Laboratory.

The UGCC Central Testing Laboratory is a leading facility in the asphalt industry testing and analysis.

The Laboratory is staffed by knowledgeable, experienced and certified technicians and professional engineers, backed with a wealth of industry knowledge and experience.

The Laboratory conforms with ISO 17025:2017 standard for testing and calibration laboratories, and provides stringent testing services as per international standards- BS, ASTM, and AASHTO, using fully calibrated.

ASPHALT

The laboratories offers a complete suite of tests and analysis of Hot Mix Asphalt (HMA). The Laboratory's independent test analysis results determine with full integrity the quality of the Asphalt; with all Performance Grades (PG) identification to ensure quality consistency that is vital to maintain quality control. state-of-the-art testing instruments with valid calibration certificates.

BITUMEN

The UGCC Central Testing Laboratory specializes in all tests and analyses of bitumen based on ASTM standards and also performs AASHTO Performance Grading.

The Laboratory provides SuperPave mix (Superior Performing Asphalt Pavements) based on Strategic Highway Research Program (SHRP) asphalt research. The SuperPave mix design incorporates performance-based, asphalt material characterization based on environmental conditions for improved performance by controlling rutting, low temperature cracking and fatigue cracking.

AGGREGATE

The Laboratory has aggregate tests for strength, toughness, hardness, shape, and water absorption. The test analyses determine the suitability of the aggregate selection with the Crushing test and Abrasion test.

DETAILS

LABORATORY TESTS AND ANALYSIS

UGCC HAS A TOTAL OF SEVEN LABORATORIES INCLUDING THE CENTRAL TESTING LABORATORY

TEST AND ANALYSIS	AGGREGATES
Quality of Aggregates	Crushing Test
Quality of Polymer Modified Bitumen (PMB)	Abrasion Test
Quality of Hot Mix Asphalt (HMA)	Impact Test
Compaction	Soundness Test
Superpave Binder Test	Shape Test
Moisture Evaluation (TSR)	Bitumen Adhesion Test
	Specific Gravity and Moisture Absorption Test

EQUIPMENT

In addition to stationary plants and fabrication facilities, UGCC invests considerably in owning and maintaining one of the largest heavy equipment fleets in the Middle East amounting to about 5000 pieces of various equipment.

The Equipment Division is managed, operated and maintained by a well-trained, experienced team of engineers and staff, ensuring rapid deployment and continuous support for the company's projects, both locally and internationally.

The equipment and fleet includes dumpers and trailers, heavy duty cranes, tower cranes, heavy duty dozers, excavators, loaders, graders and a wide range of compaction equipment. In 2015, UGCC undertook a complete upgrade of its fleet, further increasing capabilities across all business units.

WORKSHOPS

UGCC maintains quality workshop facilities with the latest equipment, and the workshops are run by trained and qualified managers, technical engineers and skilled workers. UGCC maintains seven workshops in total.
